WORDPRESS CMS RESOURCE LIBRARY

Organise every worksheet, mock paper and answer sheet clearly

This page is designed to reflect a proper WordPress-managed resource library where AEL Tuition can upload multiple PDFs across English, Maths, Verbal Reasoning, Non-Verbal Reasoning, SATs and Mock Papers.

Resources

Designed for multiple PDF uploads

Instead of one simple upload area, this design gives each resource its own entry, category and download button. That means you can upload many files under the same topic, such as VR Codes, Maths Fractions, NVR Matrices or Mock Paper 1.

English

Comprehension & SPaG

Reading papers, vocabulary packs, grammar worksheets and answer sheets.

Maths

Topic & mixed practice

Arithmetic, fractions, geometry, word problems and reasoning papers.

VR / NVR

Reasoning categories

Codes, analogies, sequences, matrices, rotation and spatial reasoning.

Mocks

Full mock paper sets

Paper PDF, answer sheet, mark scheme and feedback forms grouped together.

Front-end resource library layout

Parents and pupils should be able to search, filter and download resources quickly. The developer can connect this layout to WordPress custom posts.

How AEL Tuition would manage uploads

This workflow keeps the page scalable even when you have many PDFs.

1. Add new resource in WordPress

Admin clicks "Add Resource" and enters the title, subject, category and year group.

2. Upload the PDF files

Upload the main worksheet or paper, plus any answer sheet, mark scheme or feedback form.

3. Set access level

Choose whether the resource is public, parent-only, student-only or hidden until ready.

4. Publish once

The resource automatically appears in the correct section and filter results.

Ready for a scalable resource library

This design is suitable for a WordPress CMS setup where AEL Tuition can keep adding new PDFs, mock papers and answer sheets over time.
